SentinelOne Endpoint Security

Profile and Protect provides information to help you determine the most efficient security strategy for your Network.

SentinelOne Endpoint Security enables Companies to deliver a complete, end-to-end cyber security offering without having to build and maintain in-house operations. The product combines powerful software with a suite of SOC services to deliver both foundational security and highly advanced protections for SMB' including endpoint management, SIEM, advanced threat intelligence and the capabilities and reporting required to ensure compliance in modern business environments.

How It Works

1. Constantly monitoring and analyzing end-user environments to effectively protect against threats across endpoints and networks.

2. Identify advanced malware, exploits and script-based stealth attacks utilizing attack forensics and intelligent automation.

3. When confirmed malicious attacks are in progress, it rapidly activates remediation steps including scrubbing the system of any remnants of an attack, such as processes or registry keys created.

4. In extreme cases, the SOC will roll back the system to restore the system and data access.

5. Partner outreach for clarification and progress updates, as needed.

In extreme cases, the SOC will rapidly respond, remediate and restore system and data access.
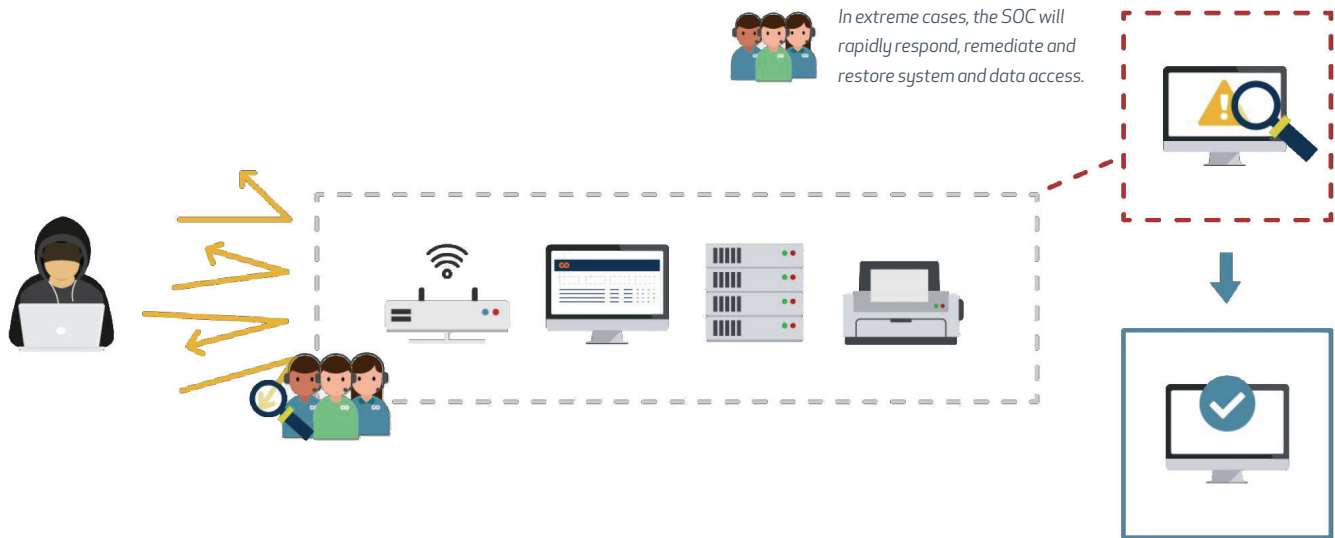

Key Features

SIMPLE OPERATIONS POWERED BY ADVANCED SOC EXPERTISE

Easily implement advanced operations without the need for in-house security expertise. The SOC analyzes quarantined applications and files, reducing false positive and ensuring comprehensive protection. It delivers a powerful service to help you overcome the significant labor challenges associated with providing managed security services..

THREAT DETECTION

Rapidly identify thousands of variants of viruses, malware and the root causes of malicious behaviors by quickly diagnosing source processes and programs.

RESPOND AND REMEDIATION

Quickly respond to detected ransomware variants by leveraging robust rollback functions through comprehensive tracking of changes at the endpoint, restoring it to an acceptable risk state.

NEXT-GENERATION ENDPOINT SECURITY

The SentinelOne* platform, a company that has secured a patent from the U.S. Patent & Trademark Office (USPTO) for its unique malware remediation technology. This solution incorporates the industry's most innovative prevention, providing visibility into the root causes and origins of the threat, reversing the malicious operations and remediating them at an agile speed, if needed.

SentinelOne offers a $1M ransomware warranty that MSPs can leverage to deliver true peace of mind to their customers.
